

# PROVIDER SEARCH

You may search for providers on the [www.cigna.com](http://www.cigna.com) public website. For ease, the direct links for the medical, dental and vision networks that apply to Palantir's Cigna plans are below.

To search for a medical provider, use the following link:

[\*\*Cigna Open Access Plus \(OAP\) Network\*\*](#)

To search for a dental provider:

[\*\*Total Cigna DPPO Network\*\*](#)

**To search for a vision provider:**

[\*\*Cigna Vision Network\*\*](#)

## TRANSITION TIPS!

- Make sure that you have a supply of any current medications prior to December 31 as you transition your prescription to Cigna.
- Any open refills with Express Scripts Home Delivery will be automatically transferred to the new coverage.
- Prior Authorizations will be honored through their current expiration dates.

# TRANSITION OF CARE

## What it is:

You are currently receiving care from a provider who is in your current health plan's network

That provider is not within the Cigna plan network to which you are switching

You may apply to receive care from that provider for a limited time until you can safely transfer to an in-network Cigna provider

## How it works:

You must apply in writing no later than 30 days after the effective date of your coverage.

You must already be under treatment for an acute medical or behavioral condition.

Transition of Care applies only to the treatment of that specific medical/behavioral condition with that health care provider. All other conditions must be cared for by a Cigna in-network provider.

Acute medical conditions that may qualify for Transition of Care/Continuity of Care include, but are not limited to:

- High risk pregnancy
- Newly diagnosed or relapsed cancer amid chemotherapy, radiation therapy or reconstruction.
- Trauma
- Transplant candidates
- Acute conditions in active treatment such as heart attacks, strokes or unstable chronic conditions
- Behavioral condition in active treatment
